Subject: Final Summary of 3/23 call w/NFS re: GL 2015-01
Date: Thursday, March 30, 2017 4:34:00 PM

On March 23, 2017, the following individuals participated in a call regarding the status of response actions for questions concerning Generic Letter 2015-01, "Treatment of Natural Phenomena Hazards in Fuel Cycle Facilities":

Kevin Ramsey, NRC
Jonathan Marcano, NRC
Brannen Adkins, NRC

Richard Freudenberger, NFS
Randy Shackelford, NFS
Amaryl Morie, NFS
Nick Brown, NFS
Sam Skiles, NFS
Blaine Rice, NFS
Bob Mauer, NFS
Ashley Morris, NFS

NFS reported that its contractor (Frank Hand, Atkins) has completed 75% of the seismic calculations and completed 40% of the written reports. All of the columns look good and all of the enclosures look good. Piping is the area where modifications appear to be needed. NFS has started work on pipe hanger improvements.

NRC asked about scheduling a call to discuss the final response before it is put in the mail. NFS agreed with having call to discuss the final response before it is submitted.

Kevin M. Ramsey
Senior Project Manager
Fuel Manufacturing Branch
