reports by January 10, 2017. By January 10<sup>th</sup>, NuScale submitted all five remaining reports and by January 12, 2017, NuScale provided updated files that allowed successful completion of NRC's electronic processing of the application package. The NRC staff acknowledged receipt of the application package on January 13, 2017. The staff began the acceptance review on January 17, 2017, and plans to make its determination on acceptability for docketing by March 17, 2017.

3. The NRC staff has been performing a limited-scope review of the US-APWR design certification application under a Mitsubishi Heavy Industries, Ltd. (MHI)-initiated coordinated slowdown of NRC licensing activities for US-APWR. The staff's review of the ABWR design certification renewal application has been impacted by the applicant's 2 year delay in submitting Revision 6 of its application. **The staff's review of the Turkey Point Combined License (COL) application has been affected by its dependence on the pace of related reviews and significant issues requiring modification of the COL application.** The staff's review of the North Anna's COL application has been affected by the applicant's decision to change reactor designs, which necessitated changes to its application, and an earthquake that required seismic reevaluation.

See narrative item #4 for additional details on the status of applications under review as of December 2016.

8. Requests for Additional Information issued by each office including the offices of Nuclear Reactor Regulation, New Reactors, Uranium Recovery, Decommissioning:

- Number of RAI's issued during each month for each office;
- Number of RAI's completed during each month for each office;
- Number of RAI's open at the end of each month for each office;
- 12-month rolling average number and 3-year rolling average number for each office;
- Amount of contractor hours charged as Part 170 fees preparing and/or reviewing RAI responses; and
- NRC staff hours charged as Part 170 fees preparing and/or reviewing RAI responses.

**Office of Nuclear Reactor Regulation (NRR)**

	<b>No. of RAIs issued</b> (Note 1)	<b>No. of RAIs completed</b> (Note 2)	<b>No. of RAIs open</b> (Note 3)	<b>Rolling average</b>
December 2016	16	23	34	Note 4
January 2017	17	13	38	

Note 1: The number of RAIs issued for NRR reflects the number of RAI transmittals to licensees each month. Each transmittal (e.g., letter, e-mail) may contain multiple RAI questions for the same licensee application.

Note 2: The number of RAIs completed for NRR reflects the number of RAI responses from licensees each month. Each response (e.g., letter) may contain responses to multiple RAI questions.

Note 3: The number of RAIs open for NRR reflects the number of RAI transmittals that licensees have not provided a response to as of the end of each month.
