Docket Nos. 50-275
 and 50-323

Mr. Fredrick T. Searls
 Vice President and General Counsel
 Pacific Gas and Electric Company
 77 Beale Street
 San Francisco, California 94106

Dear Mr. Searls:

In connection with the preparation of our Environmental Statement for the Nuclear Units 1 & 2 Diablo Canyon Site, we have established a program to determine the type and quantities of nuclides to be released annually from this facility. Personnel from the Oak Ridge National Laboratory are assisting us in this part of the environmental calculation for a gaseous and liquid effluent analysis that specifically relates to Diablo Canyon. Much of this information may already be in your application or Environmental Report, but to expedite the review we require a tabulation of this information as indicated in the enclosed list. Any data that is inconsistent with information in your SAR or Environmental Report should be identified. Forty-five copies of separate answers should be submitted for (1) the facility as presently designed and (2) any projected design changes.

This information should be provided by April 7, 1972. If it is impossible to meet this schedule please let us know. We would like to meet with you and representatives of other utilities at Oak Ridge on April 13 and 14, 1972 to discuss the use of this information in our environmental analysis. Information on this meeting will be provided later by Mr. Tom Row (ORNL).

Sincerely,

Original Signed By
 R. C. DeYoung

R. C. DeYoung, Assistant Director
 for Pressurized Water Reactors
 Division of Reactor Licensing
