PGandE Letter No.: DCL-85-065

Mr. George W. Knighton, Chief
Licensing Branch No. 3
Division of Licensing
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Re: Docket No. 50-323
Diablo Canyon Unit 2
EQ Surveillance and Maintenance Program Procedures

Dear Mr. Knighton:

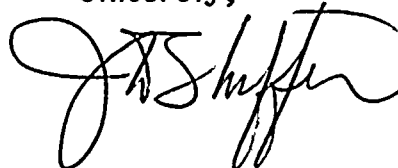

Section 3.7 of Supplement No. 15 to the Safety Evaluation Report for Diablo Canyon requires that PGandE implement surveillance and maintenance program procedures prior to receipt of a full power license. This letter confirms PGandE's schedule with regard to implementation of a surveillance and maintenance program for Unit 2.

To ensure the continued environmental qualification of equipment, a description of the surveillance and maintenance program to be implemented for both units was supplied in PGandE's letter of September 2, 1981. As discussed in that letter, the surveillance and maintenance program will encompass the identification of qualified equipment, procurement requirements, receipt, inspection, storage, scheduling, procedures, maintenance and surveillance, documentation, quality assurance and control, and training. PGandE's letter of June 5, 1984 (DCL-84-201) informed the NRC that these surveillance and maintenance procedures for Unit 1 had been implemented to address NUREG-0588.

PGandE is in the process of implementing the surveillance and maintenance program for Unit 2. This program will be implemented prior to full power operation and will fulfill the Unit 2 commitments made in PGandE's September 2, 1981 submittal.

Kindly acknowledge receipt of this material on the enclosed copy of this letter and return it in the enclosed addressed envelope.

Sincerely,

cc: R. T. Dodds
J. B. Martin
H. E. Schierling
