Dear Sir:

As one long concerned about the adequacy of the Emergency Planning Zones surrounding Diablo Canyon nuclear power plant, I am unnerved that NUREG-1150 states that "early containment failure cannot be ruled out with high confidence [for any of five plants studied.]" Given the especial situation at Diablo Canyon (e.g., the Hosgri Fault, the sparse road network, the paucity of buildings in the EPZ that offer significant protection in the event of an emergency,) to read the statements of uncertainty which permeate the study is deeply disturbing.

I had considerable concerns about "reactor risk" before I perused NUREG-1150. Such concerns have certainly not been ameliorated by the document.

Sincerely,  
*Richard Kranzloff*
