Subject: Dresden Station, Units 2 and 3, Flooding  
 of Critical Equipment - Dresden Station  
 Special Report No. 33 - AEC Dkts 50-237 and  
 50-249

Dear Mr. Ziemann:

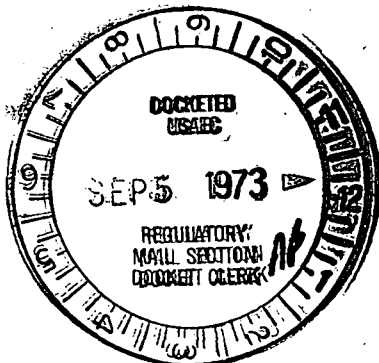

The attached Dresden Special Report No. 33, "Final Flood Protection Measures, Dresden Units 2 and 3, (Permanent Flood Protection of the Containment Cooling Service Water Pumps and Diesel Generator Cooling Water Pumps)," responds to the request for additional information in your letter dated May 9, 1973. The report discusses the design and safety evaluation of the plant modifications. It is planned to have the submersible diesel generator cooling water pumps in service and the Containment Cooling Service Water Pump vault wall erected by January, 1974. The remainder of the vault work, which includes installation and testing of various watertight seals and closures, will be completed by April, 1974.

One (1) signed original and 39 copies of this report are submitted for your use.

Very truly yours,

*J. S. Abel*
