Mr. Shahabidin –

Thank you. I have reviewed the records provided and have not issues or items of concern. Therefore, attached please find an NRC Form 591 Part 1 documenting a clear inspection. Please let me know if you have any questions or need any additional information. Thank you.

Hi Marti,

Attached please find the copy of SCA's NRC License and the leak test records for the DNDO test samples used in their Technology Demonstration and Characterization (TD&C) tests between June 2014 and November 2015.

Note: At that time, we also took leak test wipe samples for inside and outside of the safe where the SNM were stored as you can see in the some of the leak test certificates.

Please let us know if you need any additional information.

Thank you.

Subject: [External_Sender] NRC SNM License SNM-2018; Docket No. 70-7021

Dear Ms. Poston-Brown,

I am the Radiation Safety Officer responsible for the operations at Rapiscan Laboratories under NRC SNM License SNM-2018; Docket No. 70-7021 and I am located at Rapiscan's headquarters in Torrance, CA. Ed Franco, the ARSO located at Rapiscan Laboratories, asked me to provide the following information to you in support of the inspection of this facility on February 28:

- 1) Leak test records for the DNDO test samples used in their Technology Demonstration and Characterization (TD&C) tests between June 2014 and November 2015.
- 2) A copy of SCA's NRC License to demonstrate that we confirmed their ability to receive these materials.

Can we submit these materials by March 15? Ed Franco has been out of the office from March 1 and will return on March 13, 2017. He will be able to access the physical records when he returns and assemble the leak test records from our files.

In the meantime, we can provide a copy of SCA's NRC license. If you prefer, we can provide all requested information by March 15.

Please contact me if you have any questions at (email) or at (phone number).

Regards,

Mershad A. Shahabidin
