Omid,

As discussed, please find attached proposed text that NuScale is considering for a revision to the electrical topical report to address concerns with condition 4.5 of the staff draft SER. Please disseminate the non-proprietary attachment to the staff involved in the development of draft SER condition 4.5. This language is what we propose discussing during the public telecon on April 17. If you have further questions, please do not hesitate contacting Stephanie Seely or myself prior to the meeting.

Regards,
Steve
