South Texas Project
Units 1 and 2
Docket Nos. STN 50-498, STN 50-499
2017 Annual Update to the South Texas Project
License Renewal Application (CAC NOS. ME4936 and ME4937)

Reference: STPNOC Letter from G. T. Powell to NRC Document Control Desk, "License Renewal Application", dated October 25, 2010 (NOC-AE-10002607) (ML103010257)

By the referenced letter, STP Nuclear Operating Company (STPNOC) submitted an application to the Nuclear Regulatory Commission (NRC) for the renewal of Facility Operating Licenses NPF-76 and NPF-80, for South Texas Project (STP) Units 1 and 2, respectively. The application included the License Renewal Application (LRA), and the Applicant's Environmental Report – Operating License Renewal Stage. As required by 10 CFR 54.21(b), each year following submittal of the LRA, an amendment to the LRA must be submitted that identifies any change to the current licensing basis (CLB) that materially affects the contents of the LRA, including the Updated Final Safety Analysis Report (UFSAR) supplement.

This LRA update covers the period from June 28, 2016 through April 6, 2017. A review was performed on the changes to the CLB, completed plant enhancements, and LRA commitments to evaluate if there have been any changes that materially affects the contents of the LRA. It has been determined that for the period from June 28, 2016 through April 6, 2017, there have been no changes that affect the contents of the LRA.

There are no regulatory commitments in this letter.

Should you have any questions regarding this letter, please contact Rafael Gonzales, STP License Renewal Project regulatory point-of-contact, at 361-972-4779, or me at 361-972-7344.

I declare under penalty of perjury that the foregoing is true and correct.
