DOCKET NO. 50-237

Commonwealth Edison Company

WEST ADAMS STREET CHICAGO 90 ILLINOIS

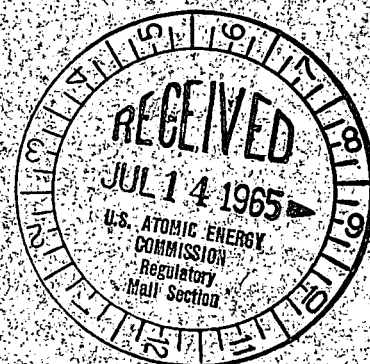

July 9, 1965

In the Matter of
the Application of
Commonwealth Edison Company

AEC Docket
50-237

Dr. R. L. Doan
Director, Division of Reactor
Licensing
U. S. Atomic Energy Commission
Washington, D. C.

Dear Sir:

Seventy copies of Amendment No. 1 to the Plant Design and Analysis Report, previously filed on April 15 and May 17, 1965, in support of the application of Commonwealth Edison Company for a construction permit and operating license for Dresden Unit 2, are submitted herewith.

Amendment No. 1 includes the following additions to Volume I of the Report: (a) Appendix F entitled "Plant Similarities and Differences", which attempts to present in brief tabular form a comparison of components of Dresden Unit 2 with corresponding components of the Oyster Creek and Nine Mile Point nuclear power plants for which construction permits have recently been issued by the Commission (AEC Dets. 50-219 and 50-220, respectively); (b) Bibliography which lists papers and documents referred to in Volume I; and (c) Pages VIII-5-1 and D-3 which were omitted from the Volume I due to an oversight.

Amendment No. 1 also effects changes in Volumes I, II and III of the Report by substitution of a number of revised pages, figures and exhibits for corresponding original pages, figures and exhibits. The changes in Volumes I and II are necessary to correct either typographical errors which could be misleading or statements which failed to properly reflect the original intentions of the applicant.

on 7/15 the Rep. of Commonwealth
advised that the portion which
goes under the index tab will
be filed later. JS

2378

- 2 -

July 9, 1965

The changes in Volume III of the Report are made in order to incorporate the expanded analysis of wind conditions at the Dresden site for each day, rather than every other day, during the period from March 15, 1963 to March 14, 1964.

Very truly yours,

COMMONWEALTH EDISON COMPANY
