To the Nuclear Regulatory Commission:

Please set as a high priority the evaluation of risks in transporting toxic nuclear waste and potential impacts related to accidents and acts of malice as you prepare an Environmental Impact Statement on Waste Control Specialists' nuclear waste storage application.

Equally important is the risk of nearby groundwater contamination.

Now should proposals for "interim storage" with no permanent de facto disposal be allowed.

No application should be granted unless all safety measure are adequately addressed.

Sincerely,

virginia wadsley
