Pacific Northwest National Laboratory (PNNL) is requesting permission on behalf of the U.S. Nuclear Regulatory Commission (NRC) to publish "Case N-824: Alternate Requirements for Ultrasonic Examination of Cast Austenitic Piping Welds from the Outer Diameter (OD) Surface, Section XI, Division 1: WHITE PAPER TECHNICAL BASIS FOR PROPOSED ALTERNATE REQUIREMENTS FOR ULTRASONIC EXAMINATION OF CAST AUSTENITIC PIPING WELDS FROM THE OUTER DIAMETER (OD) SURFACE" in the NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is the official recordkeeping system, through which the NRC provides access to publicly available documents.

Under contract with the NRC, PNNL has several staff members who are members of ASME and serve on the Task Group that created this document. The pdf document would be available on ADAMS without any changes being made.

A copy of the document in question is attached for your consideration.

Sincerely,

Kay Hass
