**Re: Our License No: 21-32044-01  
Docket Number: 030-34588**

**Dear Mr. Tran:**

I am replying to our conversation on April 19<sup>th</sup> about the amendment request dealing with the name change of my company from St. Marys Cement, Inc. (US) to St. Marys Cement U.S. LLC in my letter on February 16, 2017.

1. The reason for name change was for corporate tax reduction. There is no change in ownership. There are no changes in the radiation safety program, Radiation Safety Officer, users, facility, equipment or mailing address.
2. This year, we need to do source replenishment on both analyzers that are listed in the license and would like to do the replenishment at the same time so that our plant production is not stopped. In section 8 of our Materials License has a limit of 6 sources, of Cf-252, not to exceed a total possession limit of 148 mill curies. Each analyzer holds up to 4 sources. We request that the total maximum number of sources listed in the license be increased to 12, (6 sources per analyzer to accommodate for us to receive the source replenishment and give us some flexibility in date of installment), with the same limit of 148 mill curies.
3. In Section 9 we would like to update the device manufacturer's name to Thermo Gamma Metrics as they have changed their name.

Thank you very much.

Sincerely,

A handwritten signature in cursive script that appears to read "Frederick Hommel".

Frederick Hommel

Radiation Safety Officer
