SUBJECT: SUMMARY OF TELECONFERENCE WITH GLOBAL NUCLEAR
FUELS – AMERICAS (APRIL 18, 2017)

Dear Mr. Murray:

The U.S. Nuclear Regulatory Commission (NRC) issued Generic Letter (GL) GL-2015-01, "Treatment of Natural Phenomena Hazards in Fuel Cycle Facilities," (Agencywide Documents Access and Management System [ADAMS] Accession Number ML15086A515) on June 22, 2015. On January 29, 2016 (ADAMS Accession Number ML16029A144), Global Nuclear Fuels – Americas (GNF-A) provided its response.

The NRC staff issued a Request for Supplemental Information (RSI) to GNF-A on February 16, 2017 (ADAMS Accession Number ML17044A038). In an email dated March 16, 2017 (ADAMS Accession Number ML17075A363), GNF-A committed to formally respond to the RSI by April 19, 2017. A draft response to the RSI was placed in the GNF-A electronic reading room for review by the NRC staff. A discussion of the response was held via teleconference on April 18, 2017. Enclosed is a summary of the teleconference, during which GNF-A stated they would: 1) Provide a formal response to the RSI; 2) Provide additional analysis for specific areas of the Fuel Manufacturing Operations/Fuel Manufacturing Operations Extension building; and 3) Provide a date, whereby the final analysis would be issued. GNF-A responded to the RSI formally on April 24, 2017 (ADAMS Accession Number ML17115A097), but did not provide additional analysis or a time and date for which it would be issued.

In accordance with Title 10 of the *Code of Federal Regulations*, Part 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter with the Enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's ADAMS. ADAMS is accessible from the NRC Web site at: <http://www.nrc.gov/reading-rm/adams.html>.
