Subject: SUBJECT: ST. LUCIE 1 AND 2, SEABROOK 1 – ACCEPTANCE OF REQUESTED LICENSING ACTION RE: LICENSE AMENDMENT REQUEST – APPLICATION TO REVISE TECH SPECS TO ADOPT TSTF-522 (CAC NOS. MF9541, MF9542, AND MF9543)

SUBJECT: ST. LUCIE PLANT, UNITS 1 AND 2, AND SEABROOK STATION UNIT NO. 1 – ACCEPTANCE OF REQUESTED LICENSING ACTION RE: LICENSE AMENDMENT REQUEST – APPLICATION TO REVISE TECHNICAL SPECIFICATIONS TO ADOPT TSTF-522 (CAC NOS. MF9541, MF9542, AND MF9543)

By letter dated March 30, 2017, Florida Power & Light and NextEra Energy Seabrook, LLC submitted a license amendment request for St. Lucie Plant, Units 1 and 2, and Seabrook Station Unit No. 1. The purpose of this e-mail is to provide the results of the U.S. Nuclear Regulatory Commission (NRC) staff's acceptance review of this amendment request. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff has reviewed your application and concluded that it does provide technical information in sufficient detail to enable the NRC staff to complete its detailed technical review and make an independent assessment regarding the acceptability of the proposed amendment in terms of regulatory requirements and the protection of public health and safety and the environment. Given the lesser scope and depth of the acceptance review as compared to the detailed technical review, there may be instances in which issues that impact the NRC staff's ability to complete the detailed technical review are identified despite completion of an adequate acceptance review. If additional information is needed, you will be advised by separate correspondence.

Based on the information provided in your submittal, the NRC staff has estimated that this licensing request will take approximately 215 hours to complete. The NRC staff expects to complete this review by your requested date of March 31, 2018. If there are emergent complexities or challenges in our review that would cause changes to the initial forecasted completion date or significant changes in the forecasted hours, the reasons for the changes, along with the new estimates, will be communicated during the routine interactions with the assigned project manager.

These estimates are based on the NRC staff's initial review of the application and they could change, due to several factors including requests for additional information, unanticipated addition of scope to the review, and review by NRC advisory committees or hearing-related activities.

If you have any questions, please contact me.
