To the Nuclear Regulatory Commission:

How did this happen? We have NO idea now, have never had a solution to the problem of nuclear waste disposal and yet NRC wants to allow more nuclear power plants to be built—please explain your logic. Three years ago Dr. Ian Fairlie warned, "There's a very close association between increased childhood leukemias and proximity to nuclear power plants." Did that have NO impact on your decision making. Is it comfortable for the NRC deciders to ignore this fact?

Clearly your concern is NOT with me, my children, my grandchildren in your unwillingness over these many years NOT to close existing nuclear power plants, not to place all focus on nuclear waste problems. Did it not matter that existing plants leaked into rivers—like Indian Point on the Hudson. Only 50 miles from New York City: that escaped your notice?

Are none of you parents or grandparents like myself and my husband? Moved from New York to be close to family in Portland, Oregon, left the neighborhood of Indian Point. Learned about Hanford, Washington, 200 miles away. Hanford, the most contaminated nuclear site in the United States. Learned more: the landscape of this country is dotted with nuclear waste sites! There is no place in America to hide from nuclear waste. Why had the NRC not told Americans about this?

Build more nuclear plants? You are on the wrong side of history and you will not be absolved.

CLOSE ALL NUCLEAR POWER PLANTS YESTERDAY.
