**Subject:** [External\_Sender] Scoping Comments concerning licensing the WCS site in West Texas for temporary storage of High Level Nuclear Waste

The proposed site near Andrews, Texas threatens the health and safety of low income minority population of Eunice, New Mexico without their consent. Mixed waste effluent is already flowing cross-border into New Mexico, illegally and will only increase if the permit application is approved. See numerous points made in comments by Citizens for Alternatives to Radioactive Dumping (CARD) of New Mexico. I concur with all of those comments. New Mexico has already sacrificed much too much to the nuclear industry. The alternative of Hardened On-Site Storage (HOSS) near the origins of the waste should be the disposal method chosen. Thank you.
