Office of the Secretary
Rulemakings and Adjudications Staff
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555-0001

To Whom It May Concern:

This letter is in reference to the hearing to be held May 2nd, 2017 in regards to a challenge by Mark Oncavage, Dan Kipnis, Southern Alliance for Clean Energy, and National Parks Conservation Association (Joint Intervenors) to an application by Florida Power & Light Company (FPL) to construct and operate two new nuclear power reactors, Units 6 and 7, at the FPL Turkey Point facility near Homestead, Florida.

My name is Letizia Pallozzi (resident of Miami Beach, FL as of 6 years, and Miami-Dade County resident as of 1998) along with Stefano and Rosy Pallozzi.

I would like to submit our position of unanimous **support** of Southern Alliance for Clean Energy and National Parks Conservation Association's challenge against Florida Power & Light (FPL). We are positive that the US Nuclear Regulatory Commission will continue it's mission of protecting the people and environment of the United States while securing safe long-term energy access to us all.

With gratitude for your attention,

Letizia Pallozzi
