NUCLEAR REGULATORY COMMISSION

REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

MAY 08 2017

Ty A. Montgomery, M.D.
Radiation Safety Officer
Major Hospital
2451 Intelliplex Drive
Shelbyville, IN 46176

Dear Dr. Montgomery:

Enclosed is Amendment No. 33 to your NRC Material License No. 13-14877-01 in accordance with your February 1, 2017 letter requesting to remove a previous address of use. Please note that we have deleted Condition No. 13 in accordance with current NRC policy to include the reference to Title 10 of the *Code of Federal Regulations*, Part 71, "Packaging and Transportation of Radioactive Material," in the preamble, on page 1 of the license. Finally, we have added NRC's Agencywide Documents Access and Management System (ADAMS) document accession numbers to the documents referenced in Condition No. 13 to the amended license.

In your February 1, 2017 letter (ML17039A836) you confirmed that all residual licensed material located at the previous address of use had been removed – such that any remaining residual radioactivity in that area of use is within the limits of Title 10 of the *Code of Federal Regulations* Part 20, Subpart E, and is ALARA.

Based on its review, the staff has concluded that all licensable radioactive material has been removed from the 150 West Washington Street, Shelbyville, IN 46176 address of use referenced in your letter, and residual radioactive material attributable to licensed activities in that area of use does not exceed current NRC criteria. Based on these conclusions no further remediation or actions with respect to NRC regulated material at the previous address of use referenced in your letter are required. The address previously authorized on your license is suitable for unrestricted use.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

T. Montgomery

- 2 -

In accordance with Title 10 CFR 2.390, a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

A handwritten signature in black ink, appearing to read 'D. Strohmeyer', with a large, stylized flourish extending to the right.

Daniel C. Strohmeyer, CHP
