NUCLEAR REGULATORY COMMISSION

REGION III  
2443 WARRENVILLE RD. SUITE 210  
LISLE, IL 60532-4352

MAY 08 2017

Bari P. Chase  
Radiation Safety Officer  
Smith and Company  
901 Vine Street  
Poplar Bluff, MO 63902

Dear Mr. Chase:

Enclosed is Amendment No. 06 to your NRC Material License No. 24-18711-03 in accordance with your request.

We prepared this amendment using our new Web Based Licensing system (WBL). We deleted Condition No. 20, as it appeared on Amendment No. 5, in favor of referencing 10 CFR Part 71 in the Preamble at the top of page 1 of your license. Certain Conditions have been renumbered as a result of using the WBL system.

We completed Condition No. 15 to add the recordkeeping requirement it was supposed to have had.

We deleted Condition No. 19, as it appeared on Amendment No. 5, because non-routine maintenance is no longer authorized under this license as Mr. Slayton has departed your company.

We added ADAMS accession numbers to the documents in Condition No. 19.

This also refers to the telephone discussion on May 3, 2017, between you and me regarding the number of each type of gauge you wanted to have on this license. You will notice that the gauges you are authorized for appear as each radionuclide sealed source with appropriate vendor information unique to each sealed source and device. If our understanding in this matter is incorrect, please contact me immediately at the phone number below.

If you decide to remove authorization for one or more gauges, please contact me to obtain the types of information we will need to consider such a request.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

If you have any questions concerning this amendment or the requested information please contact me at (630) 829-9841. My fax number is (630) 515-1078.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document

Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

Colleen Carol Casey  
Materials Licensing Branch
