

AUGUST 3 1979

Mr. and Mrs. Mike Homan  
702 43rd Street  
Moline, Illinois 61265

**DO NOT WRITE IN THESE SPACES**

Dear Mr. and Mrs. Homan:

This is to respond to your letter dated May 31, 1979 expressing opposition to transporting of spent fuel from the Dresden plant to the Quad Cities plant.

The NRC currently has under review an application from Commonwealth Edison Company to allow storage of Dresden spent fuel at Quad Cities and visa versa. The purpose of this proposed action is to provide more flexibility in using available storage space at either of the two sites. Spent fuel has been transported in this manner for some 30 years. Risks to public health and safety associated with this activity are well known, and are very low.

A public hearing on the proposed shipment of spent fuel between the two sites will be held soon, probably early this Fall. The Office of the Secretary of the Commission has been requested to inform you of the time and place prior to the hearing.

Dear Sir:

I am writing in regards to several proposed nuclear-related actions by Commonwealth Edison of Chicago.

First - I am opposed to nuclear energy because of the inadequate storage methods now used for

highly radioactive waste - waste that will not dissipate for many

thousands of years. I am opposed to Com Ed bringing

509 spent fuel rods from the Dresden plant to the Dresden plant

for storage. Rods are already stored

in their own and there stored water could leak out into our environment

within 10 years or less contaminating water systems, food chains, and

many, many human beings. I am opposed to the construction

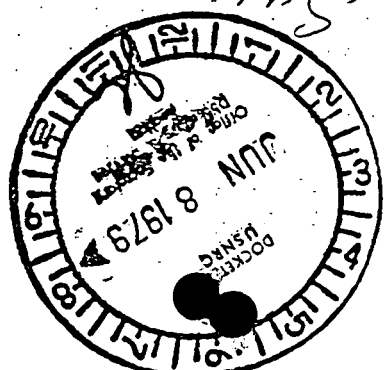

of another nuclear plant in the One-Springhill area of Illinois.

Nuclear accidents and plant safety hazards are beginning

to look like everyday occurrences.

How serious will this dangerous situation have to become before steps are taken to save our planet and ourselves.

Sincerely
