Mr. Daniel R. Muller
 Assistant Director for
 Environmental Projects
 Directorate of Licensing
 U.S. Atomic Energy Commission
 Washington, D.C. 20545

Subject: Projected Submission Date for Dresden Station
 Proposed Environmental Technical Specifications,
 AEC Dkts 50-237 and 50-249

Dear Mr. Muller:

Your letter of June 25, 1973, requested that proposed environmental Technical Specifications for Dresden Station be submitted by August 31, 1973, and that confirmation of this date or an alternate date be submitted to you within seven days after receipt of your letter. The project for developing these proposed Technical Specifications has been established and it appears that the Technical Specifications can be submitted to the Commission by September 30, 1973. Time must be allotted for review of the draft of these specifications within the Commonwealth Edison Company as required by Section 6 of the present Technical Specifications and it is felt that committing to an earlier date is not realistic.

Mr. J. Youngblood, Branch Chief for the group reviewing the Dresden docket, was informed by telephone on July 6, 1973 of the proposed submittal date.

Very truly yours,

J. S. Abel
