ENVIRO FILE

Gentlemen:

Pursuant to Section 50.50 of 10 CFR Part 50, each operating license for a nuclear power plant issued by the Commission will contain such conditions and limitations, including technical specifications, as it deems appropriate and necessary. Certain of these conditions and limitations, corresponding to key parameters of the NEPA environmental review, shall be incorporated into the operating license as environmental technical specifications. These parameters are generally identified in your environmental report and the AEC environmental statement.

Accordingly, you are requested to prepare and submit to the Directorate of Licensing proposed environmental technical specifications for Dresden Nuclear Power Station Units 2 and 3. The information that you provide will be evaluated and used to develop the environmental technical specifications which will be incorporated, as Appendix B, into the operating license for Dresden Units 2 and 3.

In order to maintain our licensing review schedule, we will need your submittal, consisting of three signed originals and 40 copies, by August 31, 1973. Please inform us within seven (7) days after receipt of this letter of your confirmation of this date or of a proposed alternate.

Sincerely,

Original signed by
Daniel R. Muller

Daniel R. Muller, Assistant Director
for Environmental Projects
Directorate of Licensing

cc: Mr. John W. Rowe
Isham, Lincoln & Beale
