 Operating Reactors - Branch 3
 Division of Operating Reactors
 U.S. Nuclear Regulatory Commission
 Washington, D.C. 20555

Subject: Dresden Station Units 2 and 3
 Quad-Cities Station Units 1 and 2
 General Electric Report NEDC-23689-P,
 "Suppression Pool Temperature Response
 to a Safety/Relief Valve Discharge
 Through a Ramshead in Mark I and II
 Containments"
NRC Docket Nos. 50-237/249/254/265

Dear Mr. Lear:

The subject report has been transmitted to the NRC by General Electric via L. J. Sobon's letter to John F. Stolz dated March 31, 1978 as part of Task 7.5 of the Mark I Containment Program. This report describes the analytical model used to predict the temperature distribution in the Mark I pressure suppression pool following SRV discharge to a ramshead. The report, "NEDC-23689-P," should be included on the Dresden Station Units 2 and 3 and Quad-Cities Station Units 1 and 2 dockets.

Very truly yours,

M. S. Turbak
