Subject: NRC Current Power Reactor Status Report for April 17

Dear Mr. Gurdziel,

Your email of April 17, 2017 was referred to me for action. Specifically, you advised that the NRC "Current Power Reactor Status Report" for April 17, 2017 was not displayed on that date. It also did not update the status for April 15 and 16. Reactor plant status for Saturday, April 15th (as well as April 16 and 17) did not post to the NRC public website due to an internal technology issue. The issue was promptly resolved and the postings are now complete.

Thank you for noting the issue and bringing it to our attention.

Bernard (Bern) Stapleton
