## General Comment

We don't need any more stupid nukes. Wake up and look around the world. Even backward China is going full tilt to solar power and hot water, on new buildings and old. England requires all new houses to be carbon neutral. Even in the US many builders are including solar as standard on new houses. Even with massive subsidies nuclear has never been cost competitive. Absolutely no one has any idea what to do with nuclear waste, except to let it pile up in corners. Coal, oil and nuclear are dead, just haven't been buried. Show me where I am wrong. Doug Franklin. Hayesville, NC
