

## Response to Public Comments on Draft Regulatory Guide DG-2004

### Emergency Planning for Research and Test Reactors and Other Non-Power Production and Utilization Facilities

#### Proposed Revision 2 of Regulatory Guide (RG) 2.6.

On February 24, 2017, the NRC published a notice in the *Federal Register* (82 FR 11660) that Draft Regulatory Guide, DG-2004 (Proposed Revision 2 of RG 2.6), was available for public comment. The public comment period ended on April 25, 2017. The NRC received one comment from the individual listed below. The NRC has listed the comment and NRC staff response in the following table.

One comment was received from Tom Kennedy. Mr. Kennedy's email is available in ADAMS at Accession number ML17151A368. No additional information is available.

Commenter	Section of DG-2004	Specific Comment	NRC Response
Tom Kennedy ML17151A368	General	I adamantly oppose ANY use, testing, and operation of nuclear power plants. Your monkey words are completely unintelligible. Do your job as the US EPA. ENVIRONMENTAL PROTECTION Agency. Stop destroying our country!	<p>The comment does not relate to the topic of the draft regulatory guide. The U.S. Nuclear Regulatory Commission (NRC) is responsible for licensing and regulating the civilian use of radioactive materials to protect public health and safety and promote the common defense and security.</p> <p>NRC regulations protect the environment, NRC fulfills its obligations under the National Environmental Policy Act, and NRC works with the U.S. Environmental Protection Agency to minimize the environmental impacts of radioactive material.</p>
