Director

Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Comm.  
Washington, D.C. 20535

Dear Sir:

Please find enclosed some petitions which were overlooked and not sent in on time.

The petitions were collected in one store location in a small town and represent only a small sampling of the dissatisfaction associated with you (pl.) and your position as advocates of nuclear energy, and the utility which has summoned you to perform your visible act.

If course, you are not totally reprehensible for your status. You are what you are now, in order to perpetuate your own existence. I will venture to say, that if any one of you were to be elected to your positions, you would be unemployed.

(over)

G

8003130138

(2)

The utility in this area also  
has done a wonderful job  
of creating public trust  
through means of deceptive  
technology.

Oh Well! Thank  
God that things do change!

Thankyou,

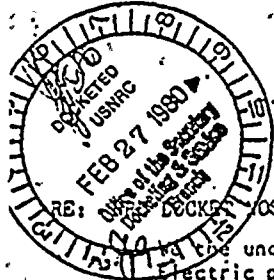

Sincerely,

Jay Dugan

## POSITION

RE: CHERRYLAKE BLOCKS OS. 50-387 &amp; 50-388 CITIZENS OPPOSITION TO OPERATING LICENSE

We the undersigned oppose the P.P. &amp; L. Nuclear Powered Susquehanna Steam Electric proposed Plant and all nuclear plants because:

1. A plant accident could occur which could kill and injure tens of thousands of people, contaminate large land areas and cause billions of dollars in property damage.
2. They produce dangerous radioactive wastes which must be stored and watched for thousands of years.
3. Transportation of such wastes through our communities can result in accidents endangering human life and contaminating our land and water.
4. They routinely emit radiation pollution which can cause cancer, genetic disorders and general life shortening.
