MEMORANDUM FOR: B. J. Youngblood, Chief, Licensing Branch No. 1,
Division of Licensing, NRR

FROM: S. H. Hanauer, Director, Division of Human Factors
Safety, NRR

SUBJECT: REQUEST FOR ADDITIONAL INFORMATION, SUSQUEHANNA STEAM
ELECTRIC STATION, UNITS 1 AND 2

50-387/388

We have reviewed the additional information submitted for Section 13.2 of the FSAR as Revision 17. Based on our review, we have determined that Section 13.2 should be revised, as indicated in Attachment A, to bring the FSAR into conformance with previously approved submittals and NUREG-0694, "TMI Related Requirements for New Operating Licenses."

Please note that the Operator Licensing Branch submitted two Second Round Questions, 441.10 and 442.3, on February 12, 1979. The response to Question 441.10, regarding the Susquehanna Fire Safety Training program, is acceptable. Although the response to Question 442.3, dealing with FSAR Section 13.5 has not been received, the responsibility for reviewing this question has been transferred from the Operator Licensing Branch to the Procedures and Test Review Branch.

This review was performed by Kevin Mahan of the Operator Licensing Branch.

Stephen H. Hanauer, Director
Division of Human Factors Safety
