PLA-1155

Docket Nos. 50-387  
50-388

Dear Mr. Schwencer:

A statement made in our letter PLA 1151, June 29, 1982 was incorrect. The low temperature alarm is provided for the ECCS suction piping (includes RCIC and HPCI) on a turbine building local panel, not in the control room.

With regards to the question concerning heat tracing on the Condensate Storage Tank instrument lines, PP&L does provide heat tracing on those instrument lines and also provides an alarm for loss of the heat tracing in the control room.

Very truly yours,

N. W. Curtis  
Vice President-Engineering & Construction-Nuclear

DPM
