Docket No. 50-387

Dear Mr. Schwencer:

As a result of the August 9, 1982 meeting attended by Bechtel Power Corporation, Teledyne Engineering Services, PP&L and the Commission, PP&L agreed to take necessary steps to provide additional information to Teledyne in order that they may reevaluate the Findings and Observations in their Final Report and reach a conclusion that the piping design process used at Susquehanna was adequate and the piping systems will permit safe operation.

Bechtel and PP&L have agreed to provide information to Teledyne, particularly that related to checking and reevaluating reconciliation judgments on 20-25 randomly selected large pipe hangers, by September 30, 1982.

Teledyne will review the information described above and provide an addendum to their Final Report by November 1, 1982. If time permits, PP&L will request that Teledyne provide the Commission with an interim assessment on or about October 15, 1982.

Very truly yours,

N.W. Curtis
