PLA-1376

Docket Nos. 50-387  
50-388

Dear Mr. Schwencer:

As a result of recent modifications to the structural dynamic models, which were described to you in PLA-1122 (vertical dynamic models) and in PLA-1184 (horizontal dynamic models), revisions to the licensing documents (FSAR and DAR) are required. Figures, tables and text reflecting response spectra, axial forces, accelerations, displacements, mode shapes and natural frequencies for both seismic and hydrodynamic response are items subject to change.

The necessary changes to incorporate the modifications for both the vertical and horizontal models will be combined into a single revision for each document and submitted to the NRC. The submittal date for these revisions has been changed from October 30, 1982 (as stated in PLA-1187) to February 18, 1983. This later date is needed to complete the necessary dynamic analyses since these analyses involve a greater number of manhours than was originally anticipated. The analytical results are required prior to revising the FSAR and DAR. We do not foresee the development of any problems as a result of issuing the document revisions by this later date.

Very truly yours,

N. W. Curtis  
Vice President-Engineering & Construction-Nuclear
