SUSQUEHANNA STEAM ELECTRIC STATION
LICENSE CONDITION 2.C.17(a)
ER 100450 FILE 841
PLA-1535

Docket No. 50-387

Dear Mr. Schwencer:

In response to License Condition 2.C.17(a) on December 22, 1982 the BWR Owner's Group submitted revision 3 of the Emergency Procedure Guidelines to the NRC for approval. This revision incorporated a "Secondary Containment Control" guideline which contains procedural steps addressing Scram Discharge Volume pipe breaks.

Contingent upon NRC approval of revision 3 of the Emergency Procedure Guidelines, PP&L will incorporate, as appropriate, those portions of the guidelines dealing with secondary containment control into the Susquehanna SES Emergency Operating Procedures as part of the Emergency Operating Procedure Upgrade Program outlined in NUREG-0899, "Guidelines for the Preparation of Emergency Operating Procedures."

The schedule for the upgrade of the Emergency Operating Procedures will be established in accordance with the requirements of NRC Generic Letter 82-33, "Supplement 1 to NUREG-0737, Requirements for Emergency Response Capability."

This letter, together with revision 3 of the Emergency Procedure Guidelines, is considered sufficient to close the subject license condition.

Very truly yours,

N. W. Curtis
Vice President
Engineering and Construction-Nuclear
