Docket No. 50-387

Dear Mr. Schwencer:

The purpose of this letter is to inform you of a change to our startup test program as described in Section 14.2 of our FSAR. We are going to perform the venting and purging portion of ST 37 in Test Condition 6 instead of during the Warranty Run. This change is being done in order to facilitate our testing schedule; it would eliminate doing any portion of ST37 during the Warranty Run. There will be no change to the test itself only the test condition in which it is performed.

We consider this to be a minor change and are implementing this change in our Startup Program.

Very truly yours,

N. W. Curtis
Vice President-Engineering & Construction-Nuclear
