SUSQUEHANNA STEAM ELECTRIC STATION  
PROPOSED AMENDMENT 23 TO LICENSE NPF-14  
ER 100450 FILE 896-03  
PLA-1634

Docket No. 50-387

Dear Mr. Schwencer:

The purpose of this letter is to propose a change to License Condition 2.C.(28)(g)(1) of License No. NPF-14. This item required PP&L to complete its safety parameter display system by September 30, 1983. Installation of a functional system is scheduled for completion by September 30, 1983. However, operator training and validation of the system must be conducted prior to considering the system operational. User training and validation of the system are presently scheduled for completion by December 30, 1983. We are, therefore, requesting License Condition 2.C.(28)(g)(1) be changed to reflect our current schedule.

This proposed change is consistent with our response to Generic Letter 82-33. Delaying the operational date for SPDS does not reduce our ability to deal with an emergency.

We have determined this change to be Class III in nature and have enclosed the appropriate fee pursuant to 10CFR170.

Very truly yours,

N. W. Curtis  
Vice President-Engineering & Construction-Nuclear

Boo!
