 Reg. File. 121

[illegible]

The image shows a document page with a grid-like structure, likely a ledger or form. The page is heavily degraded with noise and artifacts, making the content largely illegible. The layout appears to have multiple columns and rows, with some text visible at the top and bottom edges. The central area contains a large grid of cells, some of which appear to contain data or text, but they are too blurry to read. There are also some larger blocks of text or headings at the top and bottom of the page.

Docket No. 50-387

Dear Mr. Schwencer:

In accordance with License Condition 2.C.10 of License No. NPF-14, attached are three copies of the revised Inservice Inspection Program for Susquehanna SES Unit 1 for your review and approval. This document outlines our commitments for inservice inspection per ASME Section XI for the first ten year (120 month) interval and includes applicable relief requests and the ISI boundary classification drawings. The drawings attached are preliminary color coded P&IDs. These will be replaced with final coded prints (from Mylars) when they are completed. Note, also that this submittal does not contain all relief requests; additional requests may be necessary as the program is further developed.

If you have any questions, please call.

Very truly yours,

N. W. Curtis
Vice President-Engineering & Construction-Nuclear
