

MAY 09 1983

Docket Nos. 50-387  
50-388

Pennsylvania Power and Light Company  
ATTN: Mr. Bruce D. Kenyon  
Vice President, Nuclear Operations  
2 North Ninth Street  
Allentown, Pennsylvania 18101

Gentlemen:

Subject: Systematic Assessment of Licensee Performance (SALP)

The NRC Region I SALP Board conducted a review on April 27, 1983 to assess the performance of activities associated with the Susquehanna Steam Electric Station. The results of these assessments are documented in the enclosed SALP Board Reports. Since Unit 1 has recently completed start-up testing and Unit 2 is still under construction, we have considered each separately. A meeting has been scheduled for 10:00 a.m., May 17, 1983 at the Susquehanna Steam Electric Station, Salem Township, Pennsylvania, to provide a forum for candid discussions relating to the performance assessment. For Unit 1 we have oriented our assessment primarily to operation and that for Unit 2 is oriented toward construction.

Please be prepared to discuss any plans to improve performance. Any comments you have regarding the board report or the SALP process may be discussed at this meeting. Additionally, you are requested to provide written comments within 20 days of the meeting.

Following the meeting and receipt of your comments, the enclosed report, your response, and a summary of our findings and planned action will be placed in the NRC Public Document Room.

Your cooperation is appreciated.

Sincerely,

Original Signed By:

Richard W. Starostecki, SALP Board  
Chairman  
Director, Division of Project and  
Resident Programs

Enclosure: As Stated
