Docket No. 50-387

Dear Mr. Schwencer:

As requested by your staff, this letter provides information which supplements our previous letters (PLA-1384 and PLA-1420) on this item. PP&L has alerted the reactor operators via procedure changes to the consequences of containment isolation reset and valve reopening and have used caution tags on appropriate controls to assure safe operation of the Reactor Building Chilled Water System and the Liquid Radwaste System.

If you have any additional questions, please contact us.

Very truly yours,

N. W. Curtis
Vice President-Engineering and Construction-Nuclear
