Docket No. 50-387

Dear Mr. Schwencer:

In response to License Condition 2.C.29 of Facility Operating License No. NPF-14, enclosed is a copy of the report entitled "Evaluation of the NUREG 0783 Local Pool Temperature Limits for the Susquehanna Steam Electric Station". This report confirms that the local pool temperature calculated for Susquehanna SES conforms to the pool temperature limits stipulated in NUREG-0783 for all design basis plant transients involving SRV steam flow through the T-quenchers (See Appendix I of the Susquehanna SES Design Assessment Report).

Pursuant to 10 CFR 2.790 and the affidavit submitted with our August 13, 1980 letter (PLA-527), we request that those pages marked proprietary be withheld from public disclosure.

This completes our action on this license condition.

Very truly yours,
