Docket No. 50-388

Dear Mr. Schwencer:

As requested the following are Pennsylvania Power & Light Company's proposed dates to close the proposed License Condition on Susquehanna SES Unit 2.

1. License Condition

Provide a report on whether common electrical power sources or sensor malfunctions may cause multiple control system failures.

Schedule

This report will be submitted prior to exceeding 5% power as stated in our letter (PLA-1970) dated 12/21/83.

2. License Condition

Provide a report on whether high energy line breaks will result in unacceptable consequential control system failures.

Schedule

This report will be submitted prior to exceeding 5% power as stated in our letter (PLA-1970) dated 12/21/83.

Mr. A. Schwencer

3. License Condition

Provide a procedure for core damage estimation to incorporate the requirements in Section 22.2, II.B.3 of Supplement No. 3 of the Safety Evaluation Report.

Schedule

This procedure will be provided by December 1, 1984. This date is consistent with the resolution of License Condition 2.C.28(c) for Susquehanna SES Unit 1.

4. License Condition

PP&L shall complete design modifications to the emergency service water (ESW) system, approved by the staff, to eliminate single failure in the ESW system which leads to the need for an uncooled residual heat removal (RHR) pump.

Schedule

This modification will be completed by September 1, 1985. This date is consistent with the latest possible date for completion of the first refueling outage for Susquehanna SES Unit 1 and the resolution of License Condition 2.C.32 for Unit 1.

5. License Condition

PP&L shall install air dryers upstream of the air receivers.

Schedule

The air dryers will be installed by September 1, 1985. This date is consistent with the latest possible date for completion of the first refueling outage for Susquehanna SES Unit 1 and the resolution of License Condition 2.C.27 for Unit 1.

6. License Condition

PP&L shall complete its Safety Parameter Display System as follows...

Schedule

The Safety Parameter Display System will be completed by July 1, 1984. This completion date is based on our current schedule of resolving design and installation problems.
