Licensing Branch No. 2
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, DC 20555

SUSQUEHANNA STEAM ELECTRIC STATION
REVISION NO. 3 TO PROPOSED AMENDMENT NO. 36
TO LICENSE NO. NPF-14
ER 100450 FILE 841-8
PLA-2097

Docket No. 50-387

Dear Mr. Schwencer:

The purpose of this letter is to revise our requests to change Susquehanna SES Unit 1 Technical Specification 3/4.6.5 which were submitted by letters (PLA-1992, PLA-2018 and PLA-2049) dated 12/19/83, 1/5/84 and 1/21/84. This revision is a result of a meeting between PP&L and your staff on 2/22/84.

Technical Specification 4.6.5.1.c has been clarified to state when the drawdown options can be exercised.

Technical Specification 4.6.5.1.d was added at the request of the staff to ensure that a three zone drawdown would be performed periodically.

No Significant Hazards Determination

We have determined that the changes to Technical Specification 4.6.5.1 do not involve a significant hazard. The changes are similar to examples of changes that are considered not likely to involve significant hazards considerations as published in the Federal Register on April 6, 1983 on page 14870. The changes to Technical Specification 4.6.5.1.c are similar to Example i since these changes are purely administrative and only clarify nomenclature. The addition of Technical Specification 4.6.5.1.d is similar to Example ii since the changes add an additional surveillance requirement.

The following information was obtained from the records of the
 Department of the Interior, Bureau of Land Management, on
 the subject of the above-captioned tract of land.
 The tract of land described in the above-captioned
 instrument is situated in the County of [County Name],
 State of [State Name], and is more particularly
 described as follows: [Description of land]
 The above-described tract of land is owned by [Owner Name],
 who is the holder of the title to the same.
 The tract of land is situated in the [Section] of the
 [Township] of the [Range] of the [Meridian],
 and is more particularly described as follows: [Detailed description]
 The above-described tract of land is owned by [Owner Name],
 who is the holder of the title to the same.
 The tract of land is situated in the [Section] of the
 [Township] of the [Range] of the [Meridian],
 and is more particularly described as follows: [Detailed description]
 The above-described tract of land is owned by [Owner Name],
 who is the holder of the title to the same.
 The tract of land is situated in the [Section] of the
 [Township] of the [Range] of the [Meridian],
 and is more particularly described as follows: [Detailed description]

SSES PLA-2097
ER 100450 File 841-8
Mr. A. Schwencer

We would request that this change to the Technical Specifications be handled as an exigency and be issued by March 19, 1984 in conjunction with fuel loading on Susquehanna SES Unit 2. This request for exigency is based on the fact that if this Technical Specification is not changed at the time of fuel loading on Unit 2, Unit 1 would have to shut down since the existing technical specifications do not allow the three-zone operation of the Standby Gas Treatment System. We believe that we have acted in a timely manner in requesting an exigency since these new changes were requested by the staff at a meeting on February 22, 1984. Had the original request to change this Technical Specification not been changed, the change would have been issued in time to meet the fuel loading requirement of Unit 2.

If you have any questions, please contact us.

Very truly yours,

N. W. Curtis
Vice President-Engineering & Construction-Nuclear

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes the need for transparency and accountability in all financial dealings.

2. The second part of the document outlines the various methods and techniques used to collect and analyze data. It includes a detailed description of the sampling process and the statistical methods employed to interpret the results.

3. The third part of the document provides a comprehensive overview of the findings and conclusions drawn from the study. It highlights the key trends and patterns observed in the data and discusses their implications for future research and practice.

4. The fourth part of the document discusses the limitations of the study and the potential sources of error. It also provides recommendations for how these limitations can be addressed in future research and how the findings can be applied in real-world settings.

5. The final part of the document provides a summary of the key points and a final conclusion. It reiterates the importance of the study and the need for continued research in this area.
