Docket No. 50-388

Dear Mr. Schwencer:

This letter is provided to document discussions with Mr. R. Perch of your staff regarding the status of dynamic qualification of the items listed below:

Valcor CRD Pilot Solenoid Valves

These valves are dynamically qualified. The field modification to remove terminal boxes from the valves making the as-built configuration the same as the qualified configuration has been completed.

Condensate Storage Tank

An analysis has been completed which concluded that the tank is stable during a seismic event and that it presents no potential missile for the adjacent level switches.

Vacuum Relief Valves

These valves are qualified as noted in PLA-1998, item 142, and the valves have been installed in Unit 2.

Mr. A. Schwencer

Diesel Generator Fuel Oil Heat Exchanger

Dynamic qualification has been completed.

Hydraulic Control Units

Dynamic qualification has been completed.

Should you have any questions, please call W. W. Williams at (215) 770-7856.

Very truly yours,

N. W. Curtis
Vice President-Engineering & Construction-Nuclear
