SUSQUEHANNA STEAM ELECTRIC STATION
PROPOSED AMENDMENT 41 TO LICENSE NO. NPF-14
ER 100450 FILE 841-8
PLA-2205

Docket No. 50-387

Dear Mr. Schwencer:

The purpose of this letter is to provide proposed changes to the Susquehanna SES Unit 1 Technical Specifications in response to changes in 10CFR50.72 and 10CFR50.73.

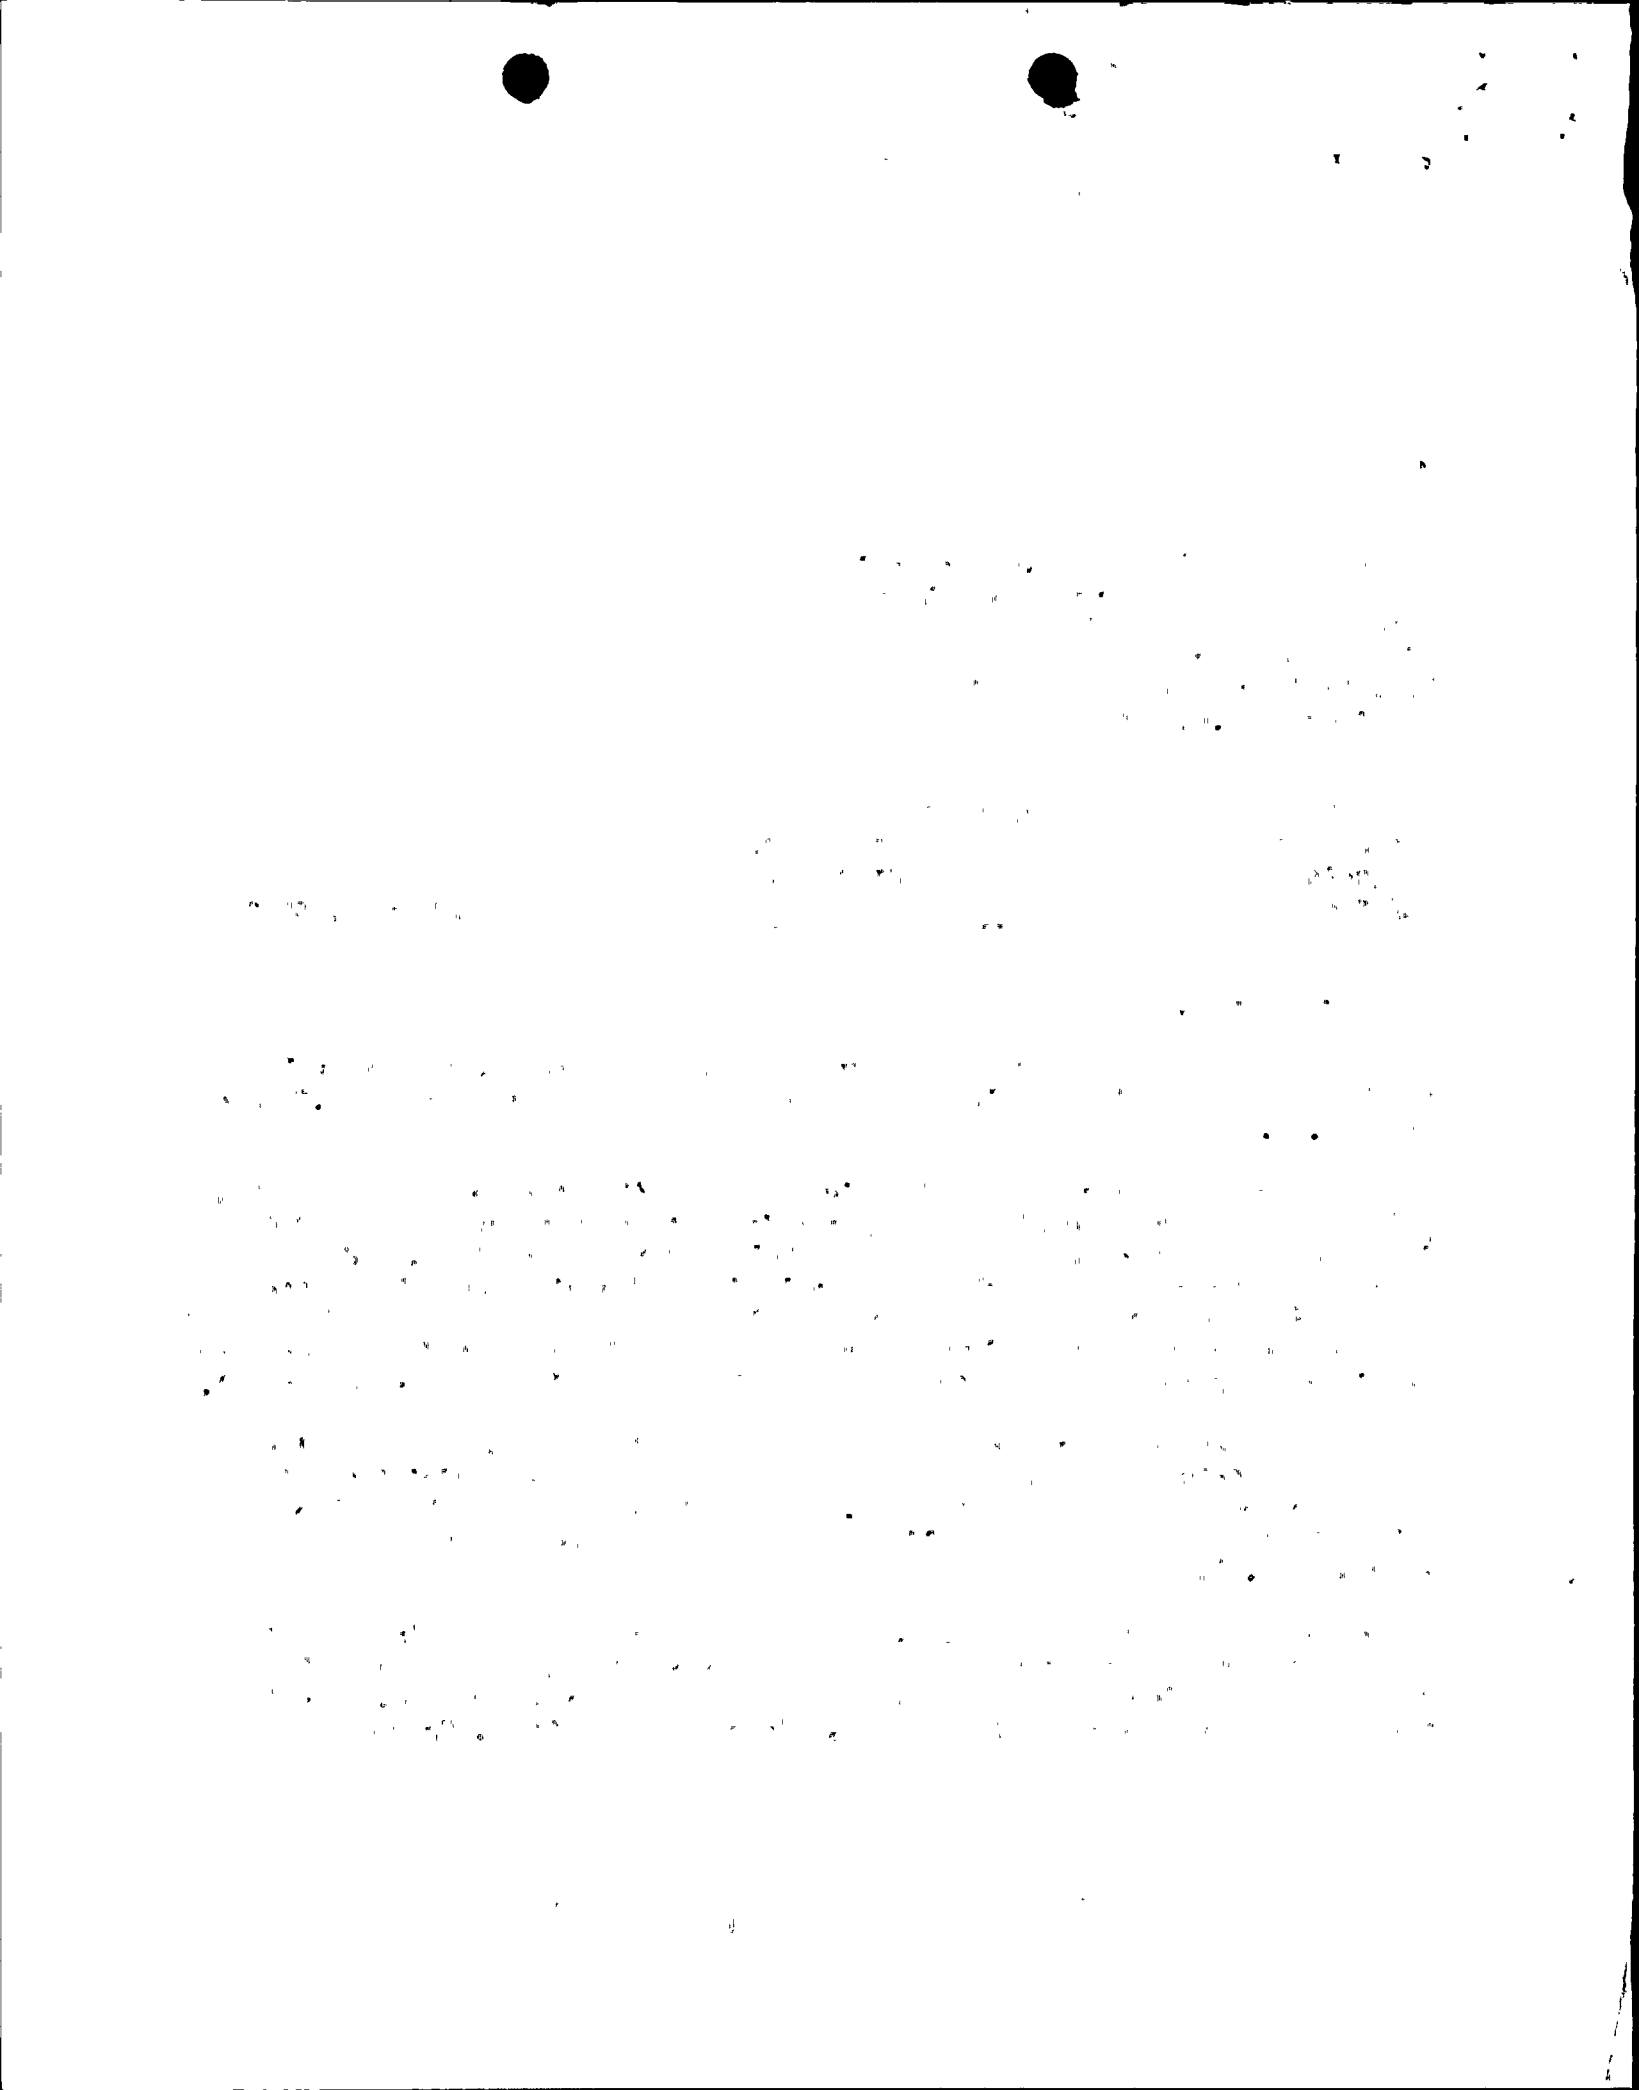

These changes, as discussed in Generic Letter 83-43 dated December 19, 1983, related changes to Special Reporting requirements as reflected in the NRC issuance of the Susquehanna SES Unit 2 Technical Specifications, and administrative changes to subsection numbering and pagination (this latter item is left for the NRC staff to correct based on reprinting after deletions) are proposed on the attached marked-up pages from the current Unit 1 Technical Specifications (a listing of the pages is also provided for cross-reference).

The proposed changes involve no significant hazards based on the examples provided in Column 3, paragraph (i) of 48FR14870 ("A purely administrative change to technical specifications ...") and Column 3, paragraph (vii) of 48FR14870 ("A change to make a license conform to changes in the regulations.").

Based upon the discussion provided above, and that no safety-related design feature or analysis is impacted by these changes, PP&L requests that this proposal be considered for issuance as an amendment to License No. NPF-14. If you have any questions on this matter, please contact Mr. R. Sgarro at
