SUSQUEHANNA STEAM ELECTRIC STATION
PROPOSED AMENDMENT 43 TO LICENSE NO. NPF-14
ER 100450 FILE 841-8
PLA-2208

Docket No. 50-387

- References:
1. Letter, PLA-2114, N. W. Curtis to A. Schwencer, dated March 20, 1984.
 2. Letter, PLA-2207, N. W. Curtis to A. Schwencer, dated May 18, 1984.

Dear Mr. Schwencer:

The purpose of this letter is to propose changes to Appendix A of License No. NPF-14, the Susquehanna SES Unit 1 Technical Specifications. This proposal represents the conclusion of PP&L's effort to upgrade the SSES Unit 1 Technical Specifications for consistency with the as-issued SSES Unit 2 Technical Specifications (see references 1 and 2).

Three attachments are provided to this letter. Attachment A provides a listing of the pages affected by this amendment. Attachment B provides the marked-up pages from the Unit 1 Technical Specifications that form this proposal. Attachment C provides a page by page justification for each of the proposed changes; where applicable this is given by reference to an example as cited in 48FR14870.

In order to avoid unit shutdown to perform one of the new tests proposed in this amendment request, i.e., 4.5.1.d.2.b, we request that its issuance be conditioned to become effective upon the next scheduled due date for performance of the surveillance. It is also requested that all changes proposed herein that affect logic system functional tests and response time tests be conditioned to become effective 90 days following NRC issuance of the changes, so that the appropriate procedural changes can be made to accommodate them.

If you have any questions on this matter, please contact Mr. R. Sgarro at (215) 770-7855. Pursuant to the requirements of 10CFR170.22 and the fact that

these changes were previously reviewed and approved in the SSES Unit 2 Technical Specifications, the appropriate fees are provided for a Class II Amendment.

Very truly yours,

N. W. Curtis
