PLA-2157

Docket No. 50-387

Dear Mr. Schwencer:

In your letter, "Outstanding Requests for Proposed Changes to Operating License No. NPF-14", dated July 6, 1983, you provided PP&L notification that three proposed changes to the Susquehanna SES Unit 1 Technical Specifications were being held in abeyance for various reasons. PP&L is now prepared to provide recommendations to resolve each of these items and one other not included in the July 6 letter.

- (1) Item 4 in Proposed Amendment 1 to License No. NPF-14, PLA-1227 dated August 18, 1982.

This change involved the development of setpoints for the SRV acoustic monitors (Specification 4.4.2). PP&L requests that this change be withdrawn from further consideration by the NRC staff. Appropriate changes were proposed to make the subject specification consistent with the Susquehanna SES Unit 2 Technical Specifications in PLA-2208, dated May 18, 1984.

- (2) Proposed Amendment 10 to License No. NPF-14, PLA-1350 dated October 19, 1982.

This changed proposed revised Type 2 molded case circuit breaker settings, addition of two Type 3 breakers previously omitted, and the correction of typographical errors in Table 3.8.4.1-1. The affected Type 2 breakers would have been reset during the first refueling outage if the change was approved; however, these breakers are now going to be replaced (at the request of the NRC staff) during the same outage. Therefore, PP&L withdraws this part of the proposed amendment from further staff consideration. Accordingly, we request that the staff move ahead with their review of the administrative changes and the addition of the two Type 3 breakers.

Mr. A. Schwencer

- (3) Item 7 in Proposed Amendment 15 to License No. NPF-14, PLA-1430 dated December 10, 1982.

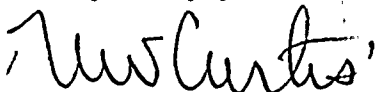

The proposed change requested that PP&L be allowed to replace, rather than test, fuses (reference Specification 4.8.4.1.a.2). PP&L requests that this change be withdrawn from further consideration by the NRC staff. Appropriate changes were proposed to make the subject specification consistent with the Susquehanna SES Unit 2 Technical Specifications in PLA-2208, dated May 18, 1984.

- (4) Proposed Amendment 7 to License No. NPF-14, PLA-1315 dated September 24, 1982; subsequent letter, PLA-1915, dated October 20, 1983.

The proposed change and subsequent request for further discussion involved Specification 4.8.1.1.2.d.12. PP&L requests that these letters be withdrawn from further consideration by the NRC staff. Appropriate changes were proposed to make the subject specification consistent with the Susquehanna SES Unit 2 Technical Specifications in PLA-2208, dated May 18, 1984.

If you have any questions on this matter, please contact Mr. R. Sgarro, (215) 770-7855.

Very truly yours,

N. W. Curtis  
Vice President-Engineering & Construction-Nuclear
