1. The purpose of this document is to provide a comprehensive overview of the current state of the project and to identify the key areas that require attention. The information presented here is intended for the use of the project management team and is not to be distributed outside of the project boundaries.

2. The project has made significant progress since the last meeting, with several key milestones being achieved. However, there are still a number of challenges that need to be addressed in order to ensure the project is completed on time and within budget.

3. The following table provides a summary of the project's progress to date, including the status of each task and the resources allocated to it. This information is intended to provide a clear and concise overview of the project's current state.

4. The project team is committed to ensuring the success of the project and will continue to work closely together to address any challenges that arise. We will provide regular updates on the project's progress and will ensure that all stakeholders are kept informed of any changes to the project plan.

SUSQUEHANNA STEAM ELECTRIC STATION
CORRECTIONS TO PROPOSED AMENDMENT 43
TO LICENSE NO. NPF-14
ER 100450 FILE 841-8
PLA-2316

Docket No. 50-387

Reference: Letter, "Proposed Amendment 43 to License No. NPF-14",
N. W. Curtis to A. Schwencer, dated May 18, 1984.

Dear Mr. Schwencer:

Per our discussions with your staff, some minor corrections need to be made to the referenced proposed amendment, which updated the Unit 1 Technical Specifications for consistency with the Unit 2 Technical Specifications.

The corrections are as follows:

1. page 3/4 1-6: Delete the reference to SRMs, IRMs, and special movable detectors, as it has already been considered via the revised definition of CORE ALTERATIONS. This correction does not alter the intent of the original proposal; it merely removes unnecessary redundant verbage. Please note that PP&L plans to correct this item in the Unit 2 Technical Specifications as well in the near future.
2. page 3/4 6-13: ACTION d requires an editorial change for clarity. This statement was revised to eliminate an inconsistency with the accident monitoring requirements that a minimum of six locations must be covered, with one detector at each location. The wording proposed in the referenced amendment has been rewritten to more clearly reflect this. This correction does not alter the intent of the original proposal; it merely clarifies the wording. Please note that PP&L plans to correct this item in the Unit 2 Technical Specifications as well in the near future.
3. page 3/4 8-18: Delete the words "ACTION: (continued)" at the top of this page. The ACTION statements start at the bottom of the same page. This change is purely administrative in nature.

Mr. A. Schwencer

For your edification the proposed changes have been marked up onto the pages from the original proposed amendment and attached to this letter.

The above corrections do not involve significant hazards considerations, per the examples in 48FR14870. They were done for editorial clarification and consistency, both of which fall under paragraph (i).

If you have any questions on this matter, please contact Mr. R. Sgarro at (215) 770-7855.

Very truly yours,

N. W. Curtis
Vice President-Engineering & Construction-Nuclear
