#### U. S. NUCLEAR REGULATORY COMMISSION REGION I OPERATOR LICENSING EXAMINATION REPORT

EXAMINATION REPORT NO. . 84-24

FACILITY DOCKET NO., 50-387 and 50-388

FACILITY LICENSE NO. NPF-14 CPPR-102

LICENSEE: Pennsylvania Power and Light Company

2 North Ninth Street

Allentown, Pennsylvania 18101

FACILITY: Susquehanna Steam Electric Station

July 30, 1984 - August 3, 1984

CHIEF EXAMINER:

John Berry Reactor Engineer Examiner

Original Signed By:

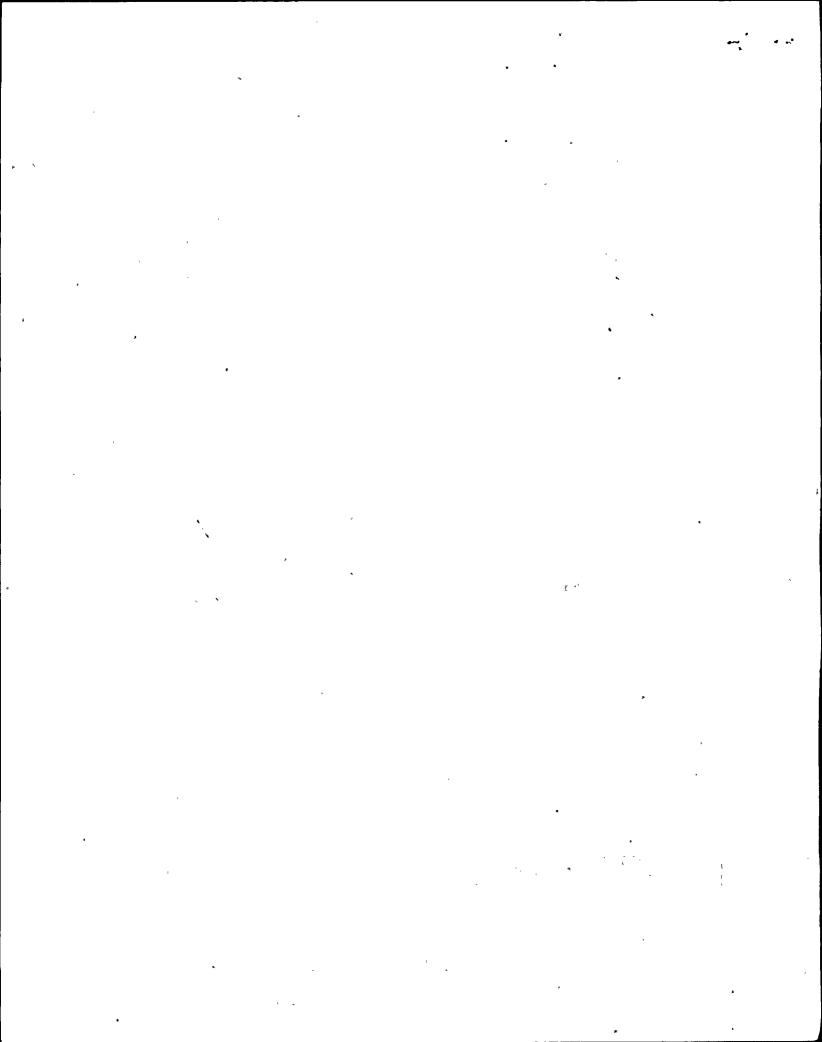

Chief, Project Section 1D

SUMMARY: This report contains the results of the Operator Licensing examinations conducted at the Susquehanna Steam Electric Station the week of July 30,

All candidates passed the written, oral and simulator sections of their respective examinations.

APPROVED BY:

1984.

### REPORT DETAILS

TYPE OF EXAMS: Initial \_\_\_\_ Replacement \_\_X Requalification

**EXAM RESULTS:** 

	RO Pass/Fail	SRO     Pass/Fail   	Inst. Cert Pass/Fail	Fuel Handler Pass/Fail
  Written Exam   	6/0	6/0	2/0	0/0
  Oral Exam	6/0	6/0	2/0	0/0
	6/0	6/0	2/0	0/0
  Overall 	6/0	6/0	2/0	0/0

1. CHIEF EXAMINER AT SITE: John Berry, USNRC - Region I

David Lange, USNRC - Region I Tom Morgan, EG&G Craig Dodd, EG&G 2. OTHER EXAMINERS:

David Graves, EG&G

# 3. PERSONS EXAMINED

RO Boyle, Michael Jacopetti, Michael Kauffman, Charles Klinefelter, Richard Miller, Jeffrey Walsh, David

SRO Boyle, Daniel Chin, Richard Hackenberg, Jesse Roland, Donald Seek, Jonathan Stitt, Bruce

Instructor Certification Allmon, John Didomenico, William

1. Summary of generic strengths or deficiencies noted on oral exams:

The examiners noted that a few of the candidates had difficulty explaining radiation control theory.

The examiners noted that the candidates displayed very effective communication skills during the simulator exams.

2. Summary of generic strengths or deficiencies noted from grading of written exams:

No generic strengths were noted. A generic deficiency was noted in understanding core effects and appropriate operator actions following dual recirculation pump failure at 100% power.

3. Comments on availability and candidate familiarization with plant reference material:

Most candidates used the plant reference material effectively.

4. Comments on availability and candidate familiarization with plant design, procedure, T. S. changes and LERs:

The candidates' familiarization with the above subjects was adequate.

5. Comments on interface effectiveness with plant training staff and plant operations staff during exam period.

Both the plant training staff and the plant operations staff were extremely cooperative during the examination period.

6. Improvements noted in training programs as a result of prior operator licensing examinations/suggestions, etc:

No improvements in training programs were suggested by the examiners.

## 7. Personnel Present at Exit Meeting:

## NRC Personnel

John Berry, BWR Chief Examiner, USNRC, Region I Dave Lange, BWR Examiner, USNRC, Region I Lynn Banavitch, BWR Examiner Trainee, USNRC, Region I Loren Plisco, SSES Resident Inspector, USNRC

## NRC Contractor Personnel

Tom Morgan, Examiner, EG&G Idaho, Inc. Craig Dodd, Examiner, EG&G Idaho, Inc. David Graves, Examiner, EG&G Idaho, Inc.

#### Facility Personnel

Terry Logsdon

- D. J. Thompson
- W. G.Ward
- H. W. Keiser
- J. A. Blakeslee, Jr.
- A. Fitch
- W. H. Lowthert
- R. M. Peal

## 8. Summary of NRC Comments made at exit interview:

The examiners noted a weakness in Radiation Control Theory in some candidates. The training department staff and on-shift crews were extremely cooperative during the examination period.

The examiners thanked Terry Logsdon for being very helpful in the administration of the simulator examinations.

The examiners remarked on the outstanding communication skills displayed by the candidates during the simulator examination.

The facility was very clean and most areas were easily accessible. The NRC Security training for site access was both concise and effective.

9. Summary of facility comments and commitments made at exit interview:

The licensee expressed concern over the rapidity of the simulator scenarios. The licensee felt that the candidates could have been adversely affected by the lack of time allowed to follow through the exercise.

# "EG&G Examiner's Resolution to PP&L Comments on SRO Exam"

Question No.	<u>Change</u>	Reason
5.04	Comment accepted.	
5.06.c	Comment accepted.	
5.10.a	Comment accepted	Added to existing answer.
5.10.b	Comment accepted	
6.03	Comment accepted.	
6.07	Comment accepted.	*
7.02	Comment rejected.	The question does not require memorization but checks the candidate's general knowledge of the procedure.
7.04	Comments rejected.	Rejection even thought the steps are in the subsequent action. The items asked for initiation criteria for SBLC anytime the criteria is met, not just after the immediate steps have been carried out.
7.07	Comments rejected.	The question is not asking for verbatim memorization.
