SUSQUEHANNA STEAM ELECTRIC STATION  
PROPOSED AMENDMENTS 65 TO NPF-14 AND 18 TO NPF-22  
ER 100450 FILE 841-8  
FLA-2421

Docket Nos. 50-387  
50-388

Dear Mr. Schwencer:

The purpose of this letter is to request changes to the Susquehanna SES Unit 1 and Unit 2 Technical Specifications in order to support a change in our onsite organization.

We have created two new positions at Susquehanna:

1. Health Physics/Chemistry Supervisor - these two functions were previously managed under two different supervisors as currently reflected in the Technical Specifications, Figure 6.2.2-1. This individual is qualified to the requirements of ANSI N18.1-1971 as required by Specification 6.3.1, will report directly to the Assistant Superintendent of Plant, and will be a voting member of the Plant Operations Review Committee (PORC). If desired by management, this individual will also fulfill the requirements of Regulatory Guide 1.8, September 1975, for Radiation Protection Manager.
2. Radiological Protection Supervisor - this individual will be responsible for administering the Station's radiological protection programs. If not fulfilled by the Health Physics/Chemistry Supervisor, he will meet the qualification of Regulatory Guide 1.8, September 1975. This position will report directly to the Health Physics/Chemistry Supervisor.

Attached are marked-up pages from the current Technical Specifications for each unit reflecting these changes. Each of these is discussed below.

- o Figure 6.2.2-1, Unit Organization: The Chemistry function has been removed from the responsibilities of the Technical Supervisor. The former Health Physics Supervisor position has been replaced by the newly created Health Physics/Chemistry Supervisor position. Reporting

Mr. A. Schwencor

FLA-2421  
File 841-8

to this new supervisor will be the Radiological Protection Supervisor, his staff, the radiological operations staff, and the chemistry staff.

- o Specification 6.3.1, Unit Staff Qualifications: This section was altered to indicate that either of the two new positions can be used to meet Regulatory Guide 1.8 qualification requirements.
- o Specification 6.5.1.2, Composition: This section was changed to replace the Health Physics Supervisor with the newly created Health Physics/Chemistry Supervisor as a PORC member.

NO SIGNIFICANT HAZARDS CONSIDERATIONS

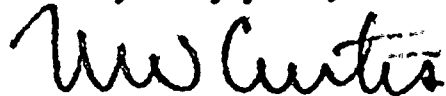

The proposed changes do not:

- (1) involve a significant increase in the probability or consequences of an accident previously evaluated,
- (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or
- (3) involve a significant reduction in a margin of safety.

This determination is based on the related examples provided in 10CFR14870, specifically paragraph (f). This change is purely administrative in nature since all individuals concerned are properly qualified.

Pursuant to 10CFR170.22, the appropriate fee has been enclosed. Any questions on this proposal should be directed to Mr. R. Sgarro at (215) 770-7855.

Very truly yours,

W. W. Curtis  
Vice President-Engineering & Construction-Nuclear
