Docket Nos. 50-387  
50-388

Dear Mr. Kister:

This letter provides PP&L's response to your letter of June 3, 1985, which forwarded NRC Region I Combined Inspection Reports 50-387/85-12 and 50-388/85-12 with Appendix A, Notice of Violation.

Your Notice advised that PP&L was to submit a written reply within thirty (30) days of the date of the letter. We trust that the Commission will find the attached response acceptable.

Very truly yours,

H. W. Keiser  
Vice President-Nuclear Operations

Faint, illegible text in the middle right quadrant.

Faint, illegible text on the left side.

Large block of faint, illegible text in the middle section.

Large block of faint, illegible text in the lower middle section.

Faint, illegible text at the bottom of the main body.

A small, dark mark or character at the bottom center.

RESPONSE TO NOTICE OF VIOLATION

Violation (387/85-12-02)

Technical Specification 4.7.7.1 requires that an 18 month visual inspection be performed of all safety-related fire dampers. Surveillance procedures SM-113-009 and SM-213-009 are used to implement this surveillance requirement.

Contrary to the above, safety-related fire dampers FPD-3-27-8-1SC, 2SC, 3SC and FPD-3-30-8-1SC are not included in procedures SM-113-009 or SM-213-009 and as of March 1, 1985, these dampers had not been inspected for a period exceeding the allowable surveillance interval of 18 months plus 25 percent.

Response:

(1) Corrective steps which have been taken and the results achieved:

Upon notification of the problem, the Fire Protection System Engineer checked the drawings and surveillance procedures. Shift Supervision was made aware of the problem and the appropriate LCO's were entered until the fire dampers were inspected and found to be open, unobstructed and free of physical damage.

(2) Corrective steps taken to avoid further violations:

Changes were made to the surveillance procedures to add the omitted Standby Gas duct fire dampers. A verification of as-built drawings has been initiated to assure that no additional dampers were omitted from the surveillance procedures. This verification will be completed by November 30, 1985.

(3) Date of Full Compliance:

Based upon the actions taken in (1) above, PP&L is in full compliance.

The first part of the document discusses the importance of maintaining accurate records and the role of the auditor in this process. It highlights the need for transparency and accountability in financial reporting.

In the second section, the author explores the various methods used to collect and analyze data. This includes a detailed look at sampling techniques and the use of statistical tools to interpret the results.

The third part of the document focuses on the practical application of these concepts. It provides examples of how the principles discussed can be implemented in a real-world setting.

Finally, the author concludes by summarizing the key findings and offering recommendations for future research. The document emphasizes the ongoing nature of this field and the need for continued innovation and improvement.

The document is a comprehensive overview of the subject matter, providing a solid foundation for further study and practice. It is a valuable resource for anyone interested in the field.

For more information, please contact the author at the address listed below. The author is available for consultation and further discussion.
