Docket Nos. 50-387  
50-388

Dear Dr. Butler:

The purpose of this letter is to inform you of certain minor changes in PP&L's plans for installation of certain Reg. Guide 1.97 variables in the TSC and EOF as described in the report attached to our letter dated May 31, 1984 (PLA-2222).

- o In Section 2.5 of the report, PP&L indicated that essential variables would be available in the TSC and EOF on either SPDS or the Plant Process Computer.
- o In Sections 3.12 (TSC) and 3.13 (EOF), PP&L explained which variables would be available on SPDS and which would be available on the Process Computer. Those variables in parenthesis would be available by June, 1987. Our report was intended to be informative rather than prescriptive. Whether a particular variable will be available on SPDS or the Process Computer is not significant.
- o Based on the above, PP&L indicated in Section 4 that the following variables would be available on SPDS in the TSC and EOF by June, 1987:

Primary Containment Isolation Valve Position  
 RCIC Flow  
 HPCI Flow  
 LPCI Flow  
 SLCS Flow  
 SLCS Storage Tank Level

We have subsequently decided that, except for primary containment isolation valve position, these variables should be available on the Process Computer rather than SPDS. This decision was based on a variety of factors including cost, ease of implementation, and schedule impacts. There is no decrease in
